

Treasury Management Online Banking Secure Tokens

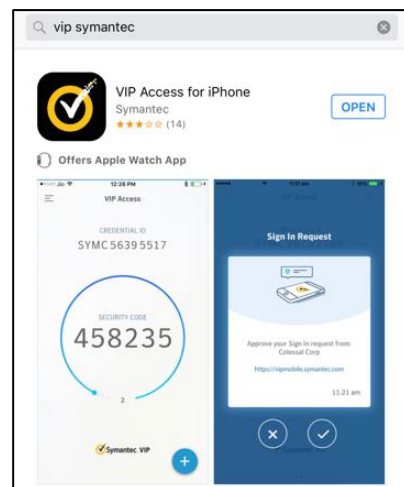

Secure Tokens are required during the login authentication process at Third Coast Bank. Treasury Management Online Banking Users may choose one of the following options for their Secure Token device.

Hard Tokens

Hard Tokens are a physical device also called a fob. These are issued by the Bank to a Treasury Management Online Banking User.

Virtual (Soft) Tokens

Soft Tokens are a virtual credential available via an App on a Smartphone device. The Treasury Management Online Banking User will download the App from their mobile App Store, App Name:
VIP Symantec/ VIP Access by Symantec

Please note: Users must register one device/virtual credential. Both options are not available at the same time, to the same user.

Please contact your local branch or Treasury Management Support for assistance with your Secure Tokens.
